

Fact Sheet: Federal Inspection Station

- The Federal Inspection Station opened in December 2002
- Four government agencies provide crucial support at the facility: the U.S. Department of Health and Human Services, U.S. Immigration and Naturalization Service, U.S. Customs Service and U.S. Department of Agriculture.
- The FIS Terminal is a two-story, 28,000-square-foot facility adjacent to Terminal B and the recently constructed Remote Deicing Collection Facility.
- Construction included the FIS Terminal and associated landside and airside improvements; entrance roadway, sidewalks and concrete hardstand for arriving aircraft parking.
- The FIS Terminal can process more than 300 passengers per hour from aircraft as large as a Boeing 747.
- International departures will be handled from the existing terminal complex.
- The facility cost approximately \$7.7 million, which included the building and site work.
- A unique, 9' x 20' American flag tile mosaic was donated by Robert LaRosa, president of LaRosa Building Group, which designed and constructed the facility according to very detailed specifications. The mosaic is visible upon entering the front of the building.
- The project was funded through the Bradley Improvement Fund.
